

To Install:

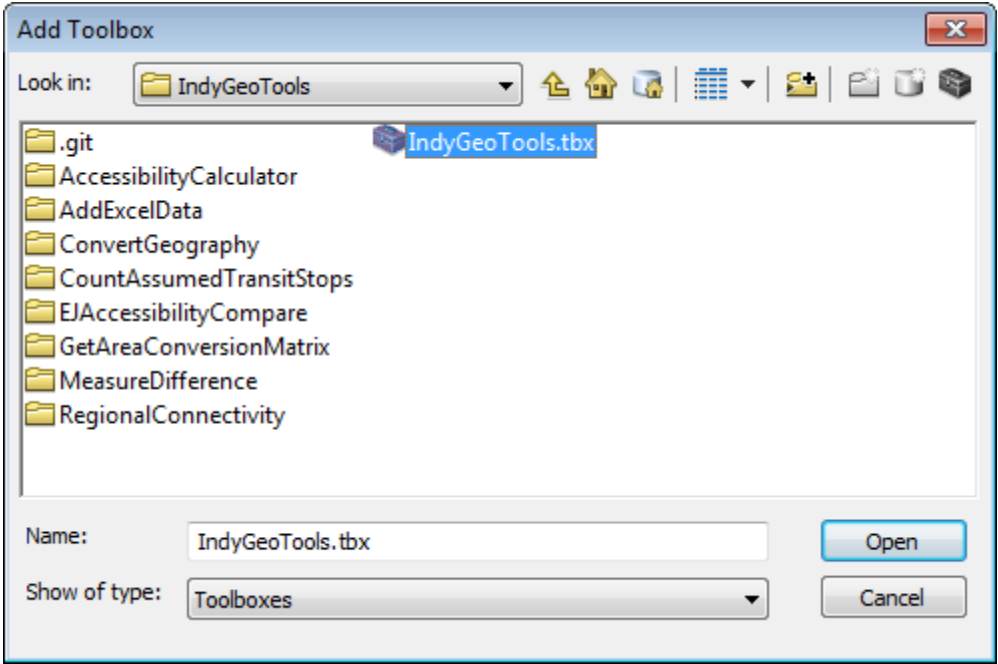

Clone or download the repository and place the “IndyGeoTools” directory to your computer or network drive.

To Run:

- 1. In ArcMap, open up ArcToolbox by selecting “ArcToolbox” in the “Geoprocessing” menu.
- 2. The ArcToolbox window will then open. Right-click “ArcToolbox” at the top of the navigation menu and select “Add Toolbox.”

- 3. Navigate to the “IndyGeoTools” directory, and open “IndyGeoTools.tbx.”

- 4. The toolbox should now be in the list of toolboxes in the ArcToolbox navigation menu
